REASON FOR TODAY'S CALL:

The kitchen sink is not draining. The drain has a garburator in it. You can hear the motor of the garburator trying to run but it isn't able. I suspect that something further down is stuck. Would you be able to provide a quote and have a look to resolve this problem?

DESCRIPTION OF WORK PERFORMED:

I was able to unjam the garburator and tested by filling and draining the sink multiple times while running the garburator. Nothing was pulled out of the garburator, whatever caused it to seize up worked its way through.
