REASON FOR TODAY'S CALL:
 Toto toilet issues. After flushing it is slow to fill and the handle must be jiggled on occasion to start the tank filling.

DESCRIPTION OF WORK PERFORMED:
 The overflow hose was rubbing against the FillValve float arm, causing the FillValve to stick and not properly fill the tank after each flush. I repositioned the overflow supply hose and adjusted the height of the float as it was set a little low. Tested and in good working order.
