REASON FOR TODAY'S CALL:

The hot water tap has come loose for the bath/shower - out from sitting in the proper position. It basically just spins freely - if you push it in sometimes you can get it to connect and turn but not consistently. Am worried of playing with it too much myself and ending up with water stuck in the on position. Have attached a couple of photos - hoping it can be repaired rather than replaced.

DESCRIPTION OF WORK PERFORMED:

There was a piece between the cartridge and handle that was installed backwards. I properly installed the handle and secured it with the set screw. Tested and in good working order.
