REASON FOR TODAY'S CALL:  
Sink kitchen faucet is leaking. I bought a new one that I am looking for you to install.

DESCRIPTION OF WORK PERFORMED:  
The Hot & Cold shut off valves located under the kitchen sink were not fully shutting the water off. Before I could replace the faucet I first had to repair these valves by locating the main water shut off valves(located in the pantry) and replacing the washers, stems, packing, packing nuts, and handles within the Hot & Cold valves under the kitchen sink. I then installed the new faucet and tested.
