REASON FOR TODAY'S CALL:  
 garburator is not turning on. It makes a low humming noise when clicked on. It does. It spin. - drainage is very poor down garburator. - dishwasher is not draining and there is standing water.

DESCRIPTION OF WORK PERFORMED:  
 -I unjammed the garburator and tested by filling draining the sink multiple times while running the garburator. I didn't notice anything outside of the ordinary inside the grinding chamber, whatever caused it to seize up was likely pushed through. -I ran the dishwasher through a few fill & drain cycles to empty the standing water. -The kitchen faucet was not secure to the sink, I tightened the nut that secures it but the faucet is very stiff to turn side to side and may end up loosening again in the future,

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Labour	\$109.00	\$109.00
SUBTOTAL:				\$109.00
GST (5%):				\$5.45
TOTAL:				\$114.45
