REASON FOR TODAY'S CALL:
garburator not working *call when en route(10 mins)

DESCRIPTION OF WORK PERFORMED:
The garburator was completely seized up and there were cracks in the housing. I replaced the garburator with a new Badger5 and tested by filling and draining both sides of the sink multiple times while running the garburator. *There was some water staining under the ptrap so I tightened the union connection and noticed no water seepage during testing.
