REASON FOR TODAY'S CALL:

-Delete garburator -Clean 2 tub & 2 lavatory sink drains -Inspect 2 toilets -Repair leaking kitchen faucet

DESCRIPTION OF WORK PERFORMED:

-I removed the garburator, installed a basket strainer in its place, and repiped the ABS drainage. Tested by filling and draining both sides of the sink multiple times. -I replaced the cartridge(K35A) within the kitchen faucet and tested. -MASTER BATHROOM: The toilet seems to be functioning normally. I used the PowerSpin drain snake to clear hair from the tub drain. The lavatory sink drain is flowing freely. -GUEST BATHROOM: The tub and sink are draining well. I suggested installing a flapper with a float in the toilet(like the master toilet) as the flapper installed stays open too long and creates unbalance in the bowl filling after a flush.
