REASON FOR TODAY'S CALL:
Toilet not flushing properly. Water rises in bowl then slowly drains out.

DESCRIPTION OF WORK PERFORMED:
I used the 6' toilet auger to clear the toilet blockage. During testing I noticed that the FillValve was not fully filling the tank or the bowl on some flushed, I believe this may be what caused the toilet to plug up. I replaced the FillValve and supply line and tested by flushing large rolled up balls of toilet paper.
