REASON FOR TODAY'S CALL:

1) cannot remove old showerhead /may have now damaged shower arm 2) check leaky bathroom taps (both bathrooms) 3) may need to replace inside toilet tank (flapper seal problem?)

DESCRIPTION OF WORK PERFORMED:

---Master Bathroom: -The shower arm snapped off, leaving the threads stuck inside the wingback 90 located behind the tile. I was able to remove these threads and installed a new shower arm, installed the customer supplied shower head, and tested. -I replaced the toilet fillvalve, seat disc(flapper), and supply line. -I replaced the cartridges, seats, and springs in the lavatory faucet. During testing I noticed a small pinhole leak in the hot supply line, I replaced this line with a braided type supply line and tested. ---Guest Bathroom: -The toilet seems to be in good working order. -I replaced the cartridges, seats, and springs in the lavatory faucet.
