REASON FOR TODAY'S CALL:

We just moved into a unit that has been sitting vacant for a long time so there are a few things that just aren't working right. Here is the list: -garbage disposal does not work, -low water pressure in kitchen sink, -dishwasher isn't cleaning well and smells -toilet isn't flushing well.

DESCRIPTION OF WORK PERFORMED:

-The garburator was seized up due to rust. I unjammed the garburator and tested by filling and draining the sink while running the garburator. -The kitchen faucet water pressure is quite low. There was no debris stuck in the spray head so I repaired the shut off valves connected to the faucet and flushed out debris. Unfortunately the pressure is still very low. Debris is stuck in areas of the faucet that I could not access. The faucet will have to be replaced. -I replaced the fillvalves, flapper, and supply lines in 2 toilets(Powder Room & Guest Bedroom Ensuite).
