REASON FOR TODAY'S CALL:

1. need help installing a new garburator. 2. (see pic) one of the switches under sink is leaking when turned on. 3. (see pic) the switch controlling the speed of toilet tank refill isn't working. refilling is relatively slow and can't be sped up or slowed down by turning the switch.

DESCRIPTION OF WORK PERFORMED:

-I installed the customer supplied garburator and tested by filling and draining the sink multiple times while running the garburator. -The Cold shut off valve under the sink (connected to the kitchen faucet) was leaking around the stem. I tightened the packing nut which stopped the leak. -The guest bathroom WC shut off valve was not functioning and the FillValve was taking a long time to fill the tank after each flush. I repaired the WC shut off valve by replacing the washer, stem, packing, packing nut, and handle. I installed the customer supplied FillValve and tested.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Install Garburator - Customer Supplied	\$149.00	\$149.00
1		Repair 1/2" x 3/8" Angle or Straight Stop - ADD-ON	\$25.00	\$25.00
