REASON FOR TODAY'S CALL:
 leak from washing machine pipe. appliance repairman has inspected and says a plumber is required.

DESCRIPTION OF WORK PERFORMED:
 I ran the laundry machine through 2 regular cycles with no sign of water. I then ran the machine through through 2 heavy loads, still no sign of water. I then used a bucket to add more water to the cycle then it would normally be subject to and still no sign of water.

TECHNICIAN RECOMMENDATIONS:
 I believe the machine itself is leaking but only during a large load. The tenant is going to run a large load through on the weekend while keeping an eye on it and will report as to where the leak is coming from once witnessed.
