REASON FOR TODAY'S CALL:  
install customer supplied kitchen faucet

DESCRIPTION OF WORK PERFORMED:  
During removal of the kitchen faucet the Hot shut off valve failed. I used a retro shut off valve to quickly stop the water so that the mainwater shut off valves could be located. Once the main valves were turned off I repaired the Hot & Cold valves (connected to faucet) by replacing the washers, stems, packing, packing nuts, and handles. After the valves were repaired I installed the customer supplied kitchen faucet and tested.
