REASON FOR TODAY'S CALL:
 Tub/shower not draining. Water backing up in tub when running the bathroom sink.

DESCRIPTION OF WORK PERFORMED:
 I ran the PowerSpin drain snake through the tub as well as the lavatory drain, removing hair out of both. I tested by filling and draining the sink multiple times, and filling the tub half way and draining.

TECHNICIAN RECOMMENDATIONS:
 The tub/shower valve handle is very stiff and hard to turn on/off. The cartridge within the valve is plastic and the stem(which is attached to the handle) is prone to snapping. I would consult with the building manager as I'm sure he has dealt with a lot of these and will likely know of a plumbing contractor that has these parts on hand.
