REASON FOR TODAY'S CALL:

Shower Drain issue. Turning water on after a few seconds, the water floods the drain. Water is just below our ankles and starts to rise. This point it doesn't seem to be draining at all. In between rinses, turn off water to try and get water level down. By end of shower, soap scum and water floating. We're not sure if the pipes are connected from the kitchen to bathroom. Coz the garburator side of kitchen sink water is slow to drain too.

DESCRIPTION OF WORK PERFORMED:

I used the PowerSpin drain snake to clear hair from the shower drain. Tested and flowing freely.
