REASON FOR TODAY'S CALL:
Running toilet Shower leaking

DESCRIPTION OF WORK PERFORMED:

-The shower is dripping from one of the heads which could just be residual water dripping out after a shower. It could also be that the shut of valve is allowing water to trickle through when in the off position. In either case it only appears to be leaking into the shower which Margaret isn't concerned with. -I replaced the flapper in the guest bathroom as well as the mechanical portion of the FillValve.
