REASON FOR TODAY'S CALL:  
There is a slow leak from the base of the toilet

DESCRIPTION OF WORK PERFORMED:  
-The toilet is secure to the tile. The toilet had not been used in a week so the area was completely dry. I tested by flushing the toilet a dozen times, holding the lever handle down to allow all of the tank water to flow through the bowl, and slid paper towel as far under the toilet as possible. No leaking was detected. -I believe what is happening is that some guests(probably of the male type;) are dribbling a little onto the floor. This would also explain why the moisture only occasionally accumulates.
