**REASON FOR TODAY'S CALL:**

Hi, our toilet seems to like to flush itself every few minutes. It's disrupting and a huge water waster. As a secondary problem we've had problems with temperature control in the showers and bathroom sink faucets - we get spurts of very hot water, first only in the bathroom that has the toilet self-flushing problem, but now also in the other bathroom. I wonder if the two problems are related. \*Shaun will be home: 778.989.7706

**DESCRIPTION OF WORK PERFORMED:**

-The toilet flapper was warped, allowing water to trickle from the tank through the bowl and cause the FillValve to refill periodically. I replaced the flapper and tested. The toilet is in good working order. -The issue with the the hot water fluctuations in the showers was due to the toilet refilling on its own, calling for cold water which lowered the cold water pressure in the shower while the hot remained the same.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace toilet flapper - standard	\$119.00	\$119.00
SUBTOTAL:				\$119.00
GST (5%):				\$5.95
TOTAL:				\$124.95
