REASON FOR TODAY'S CALL:

I believe the problem is the diverter in my shower. The water flows through the faucet, but will not be diverted into the shower head. This is an American Standard set. Can the diverter be replaced/fixe?

DESCRIPTION OF WORK PERFORMED:

I replaced the faulty tub spout with a new Delta pull-down type diverter spout. During testing I noticed the shower head was broken as well. I replaced the shower head with a standard Delta head.
