REASON FOR TODAY'S CALL:
 replace wax seal replace laundry hoses kitchen faucet leaking *key with concierge

DESCRIPTION OF WORK PERFORMED:
 -I removed the toilet, cleaned the area underneath, and reinstalled with a new wax seal and supply line. During testing I noticed the flapper was warped and the FillValve was sticking. I replaced the FillValve and flapper and tested again. -I replaced the laundry hoses with new braided stainless type hoses and tested. -The kitchen faucet was leaking through the cartridge. Before I could replace the cartridge I first had to repair the Cold shut off valve as it was not working. I repaired this valve by replacing the washer, stem, packing, packing nut, and handle. I then replaced the cartridge within the faucet and tested.
