REASON FOR TODAY'S CALL:
 Faucet leaking; sink stopper won't release water Garburetor is not working

DESCRIPTION OF WORK PERFORMED:
 ---Guest Bathroom: The lavatory faucet is leaking through the cartridge. This cartridge will have to be replaced but I cannot find a name brand anywhere on the faucet and I do not recognize the cartridge. The pop-up sink stopper was stuck in the closed position. I was able to remove the stopper but the pop-up mechanism is broken internally and I could not repair it. This will have to be replaced. ---Garburator: I was able to unjam the garburator and tested by filling and draining the sink multiple times while running the garburator. Nothing was pulled out of the garburator, whatever caused it to seize up was likely pushed through and washed down the drain.
