REASON FOR TODAY'S CALL:

I live in a low-rise condo. I can't get any hot water in the shower in my guest bath. Haven't used it in a while. I think the problem is the faucet and I suspect its been like this for a while. Cold is fine. When I turn the knob to hot, nothing comes out when I turn it to cold I get a full stream. Last time I used it, I had to 'bang' the knob a couple of times to get the hot water to work, but that no longer works. it is a basic Moen shower faucet. Thoughts on what it would cost to fix something like this?

DESCRIPTION OF WORK PERFORMED:

I replaced the mixing cartridge then realized that it was the pressure balancing spool that was causing the issue. I purchased and installed a new pressure balancing spool. Tested and in good working order.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Labour	\$109.00	\$109.00
1		Moentrol Pressure Balancing Spool	\$95.00	\$95.00
