REASON FOR TODAY'S CALL:

1. Metal under mount kitchen sink has dropped approximately 1/4". Front support board to which the support straps are attached has cracked/broken. Need to remount. 2. Need to replace kitchen faucet. Existing one is leaking. We have purchased the replacement. Assumed that it would be easier to install while the sink issue above was being done.

DESCRIPTION OF WORK PERFORMED:

-I resecured the kitchen sink using L-brackets and applied new silicone. -I repaired the Hot & Cold shut off valves under the sink(connected to the faucet) by replacing the washers, stems, packing, packing nuts, and handles. -I installed the customer supplied kitchen faucet and tested by filling the sink half way and draining while running the garburator.

TECHNICIAN RECOMMENDATIONS:

During testing I noticed the garburator was leaking through the housing.
