REASON FOR TODAY'S CALL:
 Master Ensuite: Tub not draining and tub spout constantly dripping even when the handle is in the fully off position.

DESCRIPTION OF WORK PERFORMED:
 -I used the PowerSpin drain snake to clean the tub drain. I pulled out a few bobby pins, some hair, and what looked like a pink straw. Tested by filling the tub 8" and draining. -I replaced the cartridge within the shower valve and tested.

TECHNICIAN RECOMMENDATIONS:
 The tub drain stopper is not fully seating, causing water to trickle out of the tub when it is in the fully closed position. I suggested either replacing the tub drain or removing the stopper and using a combination of hair strainer while showering and rubber drain plug while bathing.
