REASON FOR TODAY'S CALL:

Hi, I am writing because both toilets in my flat, have some leak from the flush tank into the toilet bowl. The flush works fine otherwise and there is no water to the outside of the toilet. However it seems that the valve that keeps the water in the tank when flush is not activated, does not seal properly. Please let me know what the quote would be for repair of the two toilets. I am attaching images to help with the make and model of the flush. thank you very much :)

DESCRIPTION OF WORK PERFORMED:

The flushvalve gaskets in both toilets were warped. I replaced these gaskets and tested.
