**REASON FOR TODAY'S CALL:**

My faucets in the home are receiving sufficient hot water; but the shower only produce cold water. I turned it to the max and it's warm enough but the water pressure is different. Not sure if it's the cross-connected pipes or a malfunctioning mixing valve causing the issue. If I could get a quote would be wonderful; I don't need it as 'emergency' since it's super hot nowadays but would be nice to know the cost before winter comes! Thanks =)

**DESCRIPTION OF WORK PERFORMED:**

I replaced the mixing & pressure balance cartridges within the shower valve. Tested and functioning normally.
