REASON FOR TODAY'S CALL:

We have a toilet that won't stop running. The water won't shut off using the valve on the wall behind the toilet, and the mechanism inside the toilet is also broken. No other problems with our second toilet or taps noted, but we'd like a quick check to make sure everything else is working correctly as well.

DESCRIPTION OF WORK PERFORMED:

The main cold water shut off valve was not accessible, it had been dry walled over. I cut an access in the drywall to access this main valve and repaired the WC shut off valve (connected to toilet) by replacing the washer, stem, packing, packing nut, and handle. I then replaced the toilet Fill Valve, flapper, and supply line. Tested and in good working order. Tenant reports that all other fixtures are functioning normally.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace Toilet Fill Valve, Flapper, Supply - Standard	\$169.00	\$169.00
1		Repair 1/2" x 3/8" Angle or Straight Stop - ADD-ON	\$25.00	\$25.00
