PHONE 1.310.926.6276	EMAIL morvarid.aletomeh@gmail.com		

REASON FOR TODAY'S CALL:  
 The kitchen faucet needs to be replaced. Please call 6047874726 to confirm which time slot you can have the service appointment for.

DESCRIPTION OF WORK PERFORMED:  
 When I arrived onsite the tenant mentioned that along with the leak, the kitchen faucet also had very low water pressure. I found that the Hot & Cold shut off valves under the kitchen sink were not fully shutting the water off. These valves were breaking down and bits of rubber from within the valves were being pushed into the faucet causing the pressure decrease. Before I could install the new faucet I first repaired these valves by replacing the washers, stems, packing, packing nuts, and handles. I then installed the new customer supplied kitchen faucet and tested. \*I showed the tenant where the main water shut off valves are located and explained how to use them in the case of an emergency.
