REASON FOR TODAY'S CALL:
 Came home after being away for a month to a moderate sized puddle in our bathroom. Toilet bowl nearly drained, but appears to be flushing, although flush mechanism felt different than before. Cleaned up mess and seems to have continued leaking overnight- can't visualize from where but appears to be from this pipe.

DESCRIPTION OF WORK PERFORMED:
 The shut off valve for the toilet was not working. I first had to repair this valve by replacing the washer, stem, packing, packing nut, and handle. I then replaced the toilet FillValve, flapper, and supply line. Tested and in good working order.
