REASON FOR TODAY'S CALL:
 We have a unit that has no water pressure in the bathroom and kitchen sink. There is no issue with the water in the building

DESCRIPTION OF WORK PERFORMED:
 -The shut off valves for the kitchen and lavatory faucets were breaking down internally, causing bits of debris to clog up the supply lines. I repaired the Hot & Cold shut off valves for both the kitchen and lavatory faucets by replacing the washers, stems, packing, packing nuts, and handles. I then flushed debris out of the supply lines and tested. The pressure is back to normal. -The lavatory faucet spray is erratic, I tried to replace the aerator but it is an odd size that my wholesaler does not carry.
