REASON FOR TODAY'S CALL:

There is little water coming out from the cold water faucet in the bathroom. Hot water is fine. Cold and hot water in the kitchen are fine. I tried turning on and off of the valve and it didn't make a difference.

DESCRIPTION OF WORK PERFORMED:

The cold shut off valve under the sink failed, I repaired this valve by replacing the washer, stem, packing, packing nut, and handle. Tested and in good working order.
