REASON FOR TODAY'S CALL:

Garborator is leaking, toilet tank is refilling on own, want new sink faucet, need bathtub re-caulked. *We actually don't provide recaulking services any longer. I would imagine that there a lot of plumbing companies that still do and it may be in your best interest to contact a company that does so they can get all the issues resolved in one visit.) If however you'd like us to resolve the garburator and toilet issues please reply to this email thread with pictures clearly showing the parts inside the toilet tank and I'll let ya know what I think:)

DESCRIPTION OF WORK PERFORMED:

-The garburator mounting bracket was loose. I tightened this bracket and tested by filling and draining the sink multiple times while running he garburator. No other leaks detected. -I replaced the toilet fillvalve, flushvalve gasket, and supply line and tested. -I installed the customer supplied kitchen faucet and tested.
