REASON FOR TODAY'S CALL:

-Water is coming up out of the kitchen sink. Also the garbarator is broken... Please fix both. -leaking toilet

DESCRIPTION OF WORK PERFORMED:

-The toilet was leaking from the right tank bolt, the nut securing it was little loose. I tightened this nut and tested. No other leaks detected.-The garburator grinding chamber had deteriorated to the point that bits of metal were flaking off and jamming it up. I replaced the garburator with new and tested. During testing I noticed the drainage had a very small leak coming from one of the connection. I tried to tighten this connection but the leak persisted. I repiped the ABS drainage and tested again.
