REASON FOR TODAY'S CALL:

I'm having some issues with my toilet. It sounds like it's refilling its water supply all the time, and is slowly leaking water out the front of the base.

DESCRIPTION OF WORK PERFORMED:

The fillvalve was not shutting off when the tank was full and the flapper was starting to form bubbles in it. I replaced the fillvalve, flapper, and supply line. Tested by flushing the toilet multiple times. I did not notice any leaking anywhere around the base of the toilet.
