**REASON FOR TODAY'S CALL:**

-I am in need of a plumber as our toilet has stopped working. The tank will not fill with water after flushing, but I am able to manually flush the toilet by adding water directly to the tank. I've attempted to replace the fill valve but it did not solve the problem. -Inspect behind tile in shower on second floor.

**DESCRIPTION OF WORK PERFORMED:**

-The water supply line to the toilet was an automatic shut off type and it was malfunctioning. I replaced this supply line and tested. -I removed the shower valve trim and inspected behind the tile, above and below the shower valve. No moisture was detected.
