REASON FOR TODAY'S CALL:  
 Replace bathroom faucet, two handles to one handle faucet. Check on slow drain in main bathroom sink.

DESCRIPTION OF WORK PERFORMED:  
 -The faucet is to be installed on a pedestal sink which will have to be removed and reinstalled to accommodate installation of the mechanical drain assembly. Unfortunately I did not book in enough time for this work. I recommend hiring a plumber that is more familiar with the removal and reinstallation of pedestal sinks to mitigate the time it will take to complete the job. Hillcrest may be a good place to start as they facilitate work in a lot of older buildings. I used the PowerSpin drain snake to clear hair from the lavatory sink drain and tested by filling and draining the sink several times. The drain is flowing freely and there are no signs of leaking from the connections below.
