REASON FOR TODAY'S CALL:
Running and leaking toilet

DESCRIPTION OF WORK PERFORMED:
 -The toilet fillvalve was not fully shutting off when the tank was full and the flapper was warped. The constant running of the toilet was causing condensation to buildup on the outside of the tank & bowl which was pooling on the floor. I replaced the FillValve, flapper, and supply line. Tested and in good working order. No other leaks detected. -The lavatory sink was very slow to drain. I used the PowerSpin drain snake to clean the drain and tested by filling and draining the sink multiple times.
