REASON FOR TODAY'S CALL:
 Guest Bathroom: Inspect toilet flapper.

DESCRIPTION OF WORK PERFORMED:
 The fillvalve was not fully shutting off on some flushes, causing a faint hissing noise. I replaced the fillvalve & supply line and tested. The flapper seemed to be in good condition but it was reported that on occasion it doesn't stay afloat when the tank lever is pressed. I found that if the lever was pushed super quick it may not activate the flapper but if it is pressed all the way it will activate the flapper every time.
