**REASON FOR TODAY'S CALL:**

After I flush my toilet, it fills the tank only intermittently. Water runs into the tank for a few seconds, stops, then runs again for a few more seconds and stops. This repeats several times before the water finally stops running for good. I'd like to get this fixed before it turns into a more severe problem. How much would it cost? I have attached a photo of the toilet mechanism just so you know what sort of mechanism is in there.

**DESCRIPTION OF WORK PERFORMED:**

I replaced the fillvalve & supply line with new and tested.
