REASON FOR TODAY'S CALL:
 Leaky faucet in bathtub. On going for a couple of weeks now. It was intermittent at first, but is very consistent now.

DESCRIPTION OF WORK PERFORMED:
 I removed the trim and handle and found that the tile was covering the integrals shut off valves. I chipped away enough tile to turn the valves off only to find that they were not working. Unfortunately the unit dose not have its own main water shut off valves so a building riser shut down will have to be scheduled.
