REASON FOR TODAY'S CALL:
 Toto washlet S 300 SW 834R is leaking, approximately 1/2 Tsp. 48 hours. Seems to be from under seat, not from connections. I understand you are familiar with ToTo washlet Sorry do not know how to send pictures Thankyou Installed 2007.

DESCRIPTION OF WORK PERFORMED:
 Water is leaking out of where the electrical runs into the unit. I removed the seat cover to expose the electrical and water connections within the unit and could see moisture but could not see the source. I have suggested either sending the seat into Toto to have them repair, or another option would be to purchase a new one from Cantu.
