REASON FOR TODAY'S CALL:  
leak under kitchen sink

DESCRIPTION OF WORK PERFORMED:  
The 1-1/2" copper drain that comes from behind the cabinet is thinning along the bottom. The thinning seemed to be the worst at the point where the ABS drainage from the sink connected to it. I cut back the cracked copper drain pipe and reconnected the ABS drainage. Tested by filling and draining the sink multiple times with no sign of leaking.

TECHNICIAN RECOMMENDATIONS:  
While this copper drain pipe is not currently leaking I would suggest having it replaced very soon as the thinning on the bottom of the pipe could easily start leaking further down the drain line.
