REASON FOR TODAY'S CALL:

We have leaks in kitchen sink and 2 bathroom sinks. 2 sinks have cracked connections and 1 has a leak at the connection

DESCRIPTION OF WORK PERFORMED:

-Guest Bathroom: The leak was coming from the rubber washer at the connection between the bottom of the sink and the mechanical drain assembly. I loosened the nut that secures the drain assembly, added plumbers putty above the rubber gasket, and re-tightened. Tested by filling and draining the sink multiple times. -Master Bathroom: The Mechanical Drain Assembly was cracked, I replaced this drain assembly and tested by filling and draining the sink multiple times. -Kitchen: There were leaks coming out of two section of the ABS drainage. I repiped the ABS drainage back to the coupling and tested by filling both sides of the sink and draining. No other leaks detected.
