**REASON FOR TODAY'S CALL:**

For a pedestal bathroom sink. the waste pipe appears to be leaking slightly just after the P-trap before the pipe goes into the wall.

**DESCRIPTION OF WORK PERFORMED:**

-I removed the portion of the trap that was leaking, it seemed to be in good shape so I cleaned it up and applied permatex to the inside of the coupling before reinstalling. This stopped the leaking. -During testing I noticed the drain was backing up. I used the PowerSpin drain snake to clean the drainage and tested by filling and draining the sink multiple times. No other leaks detected.
