REASON FOR TODAY'S CALL:
Leaky faucet in the 2nd bathroom

DESCRIPTION OF WORK PERFORMED:

-The tenant mentioned that the lavatory faucet in question takes a while to fully shut off. I tested the faucet and it is functioning normally, this type of faucet (Dornbracht wall mount) has a spout that drains the water out slowly after each use, the water is all drained out after 10-15 seconds which is normal for this faucet. -While onsite the tenant mentioned the faucet above the stovetop leaked water shortly after using it. I tested the faucet and it did not have any signs of leaking. I suggested keeping a metal bowl under the faucet spout for the next few days to ensure there isn't any further leaking noticed.
