REASON FOR TODAY'S CALL:
 guest bathroom lavatory faucet leaking.

DESCRIPTION OF WORK PERFORMED:
 -The Cold shut off valve under the sink (connected to the faucet) was partially closed, causing the washer inside to vibrate when in use. I opened this valve fully and the noise has subsided. -While onsite I was asked to snake the lavatory drains and the shower in the master bathroom. I used the PowerSpin drain snake to clean both lavatory drains as well as the shower drain. Tested and in good working order.
