**REASON FOR TODAY'S CALL:**

Hi Darren, I had called about a month ago as my dishwasher is pooling clean water at the bottom. It began around the time my garburator was replaced, but I also had the front panel replaced on my dishwasher shortly before or after that. We had a brief chat on the phone, and I have since had someone in to check and reset the dishwasher panel, as well check as the valve and a few other things. They don't seem to think that anything was wrong with the dishwasher. It's happening a little more frequently and I'm wondering if you have any thoughts on what it might be, and if it would be worth coming to take a look.

**DESCRIPTION OF WORK PERFORMED:**

- I filled both sides of the kitchen sink, and before draining the left sink I removed the plug on the right side (garburator side) and had the garburator on, forcing water through the drain to create more pressure in the drainage. - I also disconnected the dishwasher drain hose and it is clear. Reconnected and tested again.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
0.5		Labour	\$109.00	\$54.50
SUBTOTAL:				\$54.50
GST (5%):				\$2.73
TOTAL:				\$57.23
