REASON FOR TODAY'S CALL:
Leaky sink.

DESCRIPTION OF WORK PERFORMED:

-Apr11: The kitchen faucet was leaking from the handle onto the top of the sink and finding it's way to the cabinet below. Before I could replace the cartridge located behind the handle I first had to repair the shut off valves under the sink (connected to the faucet) by replacing the washers, stems, packing, packing nuts, and handles. I then replaced the leaking cartridge (K35a) and tested by running the faucet for a few minutes, making sure to move the position of the head and switch between spray functions. The leaking from the handle has subsided but during testing I noticed the garburator was leaking through the bottom as well as from cracks in the housing. -April12: I replaced the garburator with a new Badger5 and tested by filling and draining both sides of the sink multiple times while running the garburator.
