REASON FOR TODAY'S CALL:
 Bathtub drain plug has disconnected and not draining well.

DESCRIPTION OF WORK PERFORMED:
 I tried to remove the brass stopper lever arm that fell down the tub drain but was unsuccessful, I was however able to remove the tip of a razor. Using a camera snake I can see that the lever arm is stuck in the p-Trap below slab. As this lever arm is brass there is no fear of it corroding but hair is more likely to get caught on this obstruction. I used the PowerSpin drain snake to remove hair from around and past the lever arm and tested by filling the tub 8? and draining.

TECHNICIAN RECOMMENDATIONS:
 I suggest replacing the tub drain with a lift & turn style drain to mitigate the chances of abject finding their way down the drain.
