REASON FOR TODAY'S CALL:

Kitchen faucet's hot water at almost a trickle. Cold water works fine and has decent pressure. Hot water is working fine everywhere else in the apartment. Faucet is a Moen model # 87096.

DESCRIPTION OF WORK PERFORMED:

I repaired the Hot & Cold shut off valves under the sink (connected to the faucet) by replacing the washers, stems, packing, packing nuts, and handles. I then flushed out as much debris as I could. The pressure on the hot side was much better at first but during testing it gradually dropped back to a trickle. I removed the cartridge but could not flush any debris out from this side either.
